

VOTE on public access to Site Logs

- On 02.10.2014 e-mailed to all ESDB contacts

Admission to make the ESDB Site Logs publicly available

Following the 25th Conference of the EUPOS Steering Committee of May 6-7, 2014 in Riga, Latvia the reorganisation of the EUPOS Station DataBase (further on ESDB) is going on. In the present phase an FTP server is set up, where all Site Log files are to be made available in the near future. This server will be always updated with the latest changes and will also contain the former Site Logs, just like in the present form of the ESDB.

Now only the EUPOS members have access to the logfiles, but the FTP server makes it possible to make the Site Logs publicly available. To revoke the restriction of the limited access we need the confirmation of every member, so only the Site Logs of those will be publicly available, who admit it.

So please fill in the following form regarding the public access of your reference stations Site Log files and send it to the EUPOSISC Vice-Chairman, Artur Oruba (artur.oruba@eupos.org) with a copy of it to Péter Braunmüller (braunmuller@gnssnet.hu) no later than 08.10.2014.

EUPOS member (organization and the name of the representative delegated to EUPOS Council):

[Click here to enter your organization name](#)

- I allow to make the Site Logs of the reference stations maintained by my institution in the EUPOS Station DataBase to be publicly available.
- I forbid to make the Site Logs of the reference stations maintained by my institution in the EUPOS Station DataBase to be publicly available and ask to keep the restricted access of the Site Logs.
